

Тестові завдання до заняття «Ліки»

Complete the sentence. Everyone knows that medicines, or drugs are chemical substances used to make you ____better when you are sick.

invite
treat
feel
establish
extend

Complete the sentence. Drugs can be made from the chemical _____which are synthesized in the laboratory.

substances
destructions
diagnoses
dangers
diversions

Complete the sentence. Some medicines should be taken with food while others should be taken on an empty_____.

shoulder
spleen
wrist
stomach
liver

Complete the sentence. For example, there is a wide variety of cardiovascular drugs, _____drugs, neuropharmacological drugs, antibiotics, neoplastic drugs, hormones, and others.

gastrointestinal
gastroscope
gastritis
gastroectomy
gastrology

Complete the sentence. _____medicine may come in a number of different dosage forms such as tablets, capsules, and liquids.

oral
nasal
eye
therapeutical
stomatological

Complete the sentence. In general, it is the best to take _____medicines with a full glass of water.

oral
eye
mouth
larynx
esophagus

Complete the sentence. Antihistamines are drugs, which block the _____ of chemicals called histamines, which are found in the body.

technosphere
teaching
technologists
action
acting

Complete the sentence. They play an important role in the metabolic _____ of the body.

career
processes
remedy
prevention
disease

Complete the sentence. All drugs are grouped into several classes depending on their pharmacological _____ on the body, target organs or systems, etc.

effects
learns
teaches
observes
examines

Complete the sentence. Make sure that your health care provider _____ all of the medicines and supplements you are using.

knows
examines
prescribes
administers
complains

Complete the sentence. There are two major types of neuropharmacological drugs: autonomic and central nervous _____ drugs.

regimen
cause
system
medicine
level

Complete the sentence. Cardiovascular drugs may be _____into three groups
determined
observed
caused
watched
divided

Complete the sentence. Different medicines should never be _____in one
container.
protect
assist
elaborate
mixed
help

Complete the sentence. Antibiotics have been _____in the laboratory and are used
to treat serious bacterial infections.
synthesized
prescribed
caused
specialty
especial

Complete the sentence. There are many routes of drug _____.
administration
entering
starting
completing
finishing

Insert the missing prepositions. Drugs are obtained ____various parts of plants,
such as the roots, leaves, and fruit.
from
of
on
for

Choose the correct variant. Lack of vitamin A may lead to a rare condition called night blindness, as well as dry eyes, _____, and slowed growth.

eye infections, heart problems
eye infections, skin problems
ear infections, skin problems
eye glass, skin problems
eye infections, ear problems

Choose the correct variant. The form of vitamin A found in is called beta-carotene.
roots
plants
planets
flowers
water

Choose the correct variant. _____such as vitamins A, D, E, and K are absorbed from the intestine along with lipids, and some of them can be stored in the body for a long period of time.
Fat-soluble vitamins
Water- soluble vitamins
Fat-containing vitamins
Water- insoluble vitamins
Acid-soluble vitamins

Choose the correct variant. Butter, eggs, and fatty fish such as herring, mackerel, and salmon naturally contain_____.
Vitamin C
Vitamin K
vitamin D
vitamin A
Vitamin B

Choose the correct variant. _____work to change vitamin D into the active form the body can use.
The ear and kidneys
The liver and kidneys
The spleen and kidneys
The livers and kidney
The liver and nutrients

Choose the correct variant. Don't take more than 400 IU (units) of vitamin D a day unless prescribed by your_____.
physician
physical
physics
nurse
chemists

Choose the correct variant. Vitamins don't have calories, so they can't give _____.

- energy
- energetic
- action
- act
- activity

Choose the correct variant. Vitamin E is stored in the _____ and taking too much over a period of time may cause harmful effects.

- water
- body
- liver
- brain
- food

Choose the correct variant. Vitamin D is sometimes called the "_____ " since it is made in the skin when the human is exposed to sunlight.

- sun vitamin
- son vitamin
- sunshine vitamin
- yellow vitamin
- skin vitamin

Choose the correct translation: The story of vitamins actually (починається) in 1911, when a Polish chemist extracted from rice polishings a crystalline substance.

- begins
- follows
- passes
- enters
- determines

Choose the correct translation: The crystalline substance extracted from rice polishings was capable to (вилікувати) beri-beri.
